

Data Backup Home Office Solutions

Your business uses technology daily. You depend on your accounting files, e-mail files, customer files, and your daily work data. But are they safe from a data disaster – fire, theft, or virus attack?

Many home office computer users backup their data to CDs or other media. This process can be cumbersome and time-consuming, if it is done at all. There is a more convenient and cost-effective solution.

Remote Backup from DataPreserve™

Ideal for home users and home offices that have up to five computers and high speed data connections. Remote Backup is easily installed and once setup, has a set-it-and-forget-it setting. Your data is encrypted and stored remotely in a secure data center. Restoration is a simple process any time of day or night. No tapes, no CDs or DVDs to store and lose. No big bill to pay.

Use Remote Backup for:

Accounting files for QuickBooks™ and other programs

Financial files for MS Money™, Quicken™, TurboTax™ and others

E-mail files in MS Outlook™, Outlook Express™ and others

Flyers, brochures, letters and correspondence of all types

Digital pictures of children, family events, travel, relatives, insurance documentation

Genealogy programs like OneWorldTreeSM or Family Tree Maker ®

Find out more about Remote Backup plans for home offices. You can have peace of mind knowing that your data is safe. And when the unexpected happens, you know your data is retrievable.

Contact us to be sure all your critical files are backed up remotely.
