

## Remote Data Backup for Real Estate Agents

### Reasons for DataPreserve Remote Data Backup

- 19 out of 20 small businesses that lose their computer data for at least 10 days go out of business
- 2000 laptops are lost or stolen every day
- Remote backup helps Real Estate Agents comply with FACTA disposal rules by reducing the use of unsecured backup devices (tapes, thumb drive, zip disks, etc.)
- You gain peace of mind knowing your business data is safe

### What types of data should be protected?

- Property listings information and Contact Management software
- Client information on PCs and laptops including vital personal information and credit scores
- QuickBooks® and other business data files
- Daily files any small business would need, such as documents, databases, presentations and spreadsheets
- E-mail files including Office Outlook® and Outlook Express® files

*"In our business we deal with contracts everyday and are held accountable for keeping detailed records of them. Losing any one of these contracts would be terrible, but thanks to DataPreserve we know that our data is safe and secure. The process is truly seamless and effortless, and its services such as these which are inspiring the notion of having all contracts stored electronically."*

President and Owner, Walt Cook  
Square One Realty
